### Passage 1

The Bermuda Triangle occupies a disturbing and almost unbelievable place in the world's catalog of unexplained mysteries. More than a hundred planes and ships have vanished in this area into the air since 1945, and more than a thousand lives have been lost, without a single body or even a piece wreckage from the vanishing planes or ships having been found. Many of the planes concerned have vanished while in normal radio contact with their base until the very moment of their disappearance, while others have radioed the most extraordinary messages, implying that they could not get their instruments to function, that their compasses were spinning, that the sky had turned yellow and hazy on a clear day, and the ocean, which was calm nearby, didn't look right without further clarification of what was wrong.

**66. One can infer from the reading that .....**

- 1) the wreckages of some ships and planes have been found in the Bermuda Triangle
- 2) the number of incidents involving lost ships is no larger than that of any other heavily traveled region of the world
- 2) the ships and the planes couldn't contact with their base due to the lack of equipment.
- 4) the first mention of disappearances in the area was made in 1945

**67. It is pointed out in the passage that .....**

- 1) thousands of people lost their lives in the Bermuda Triangle in 1945
- 2) all of the disappearances happened during the day time
- 3) the Bermuda Triangle mystery was solved in 1945
- 4) most of the missing planes could contact with their base by their own special means until the very moment of disappearing

**68. The reading mainly deals with .....**

- 1) why so many ships and planes disappear in the Bermuda Triangle
- 2) the mysterious disappearances of ships and planes in the Bermuda Triangle
- 3) the location of the Bermuda Triangle
- 4) the frequency of the disappearances in the Bermuda Triangle

## Passage 2

Many people with high IQ scores fail to become successful due to lack of motivation, laziness, or short attention span. In contrast, some people with low IQ succeed with greater personal dedication, systematic effort, and motivation. One can eliminate the disadvantage that comes with a low IQ score by choosing the right career path. For example, one might have special talents for a particular sport while failing to perform as well as the others academically. This can be justified with greater motivation and dedication. Individuals will have greater motivation in pursuing careers they are skilled at. They will like it more and put more effort in it. One of the best ways parents can help is to help their children discover themselves and their skills.

**71. Some very intelligent people can have failures because .....**

- 1) they have short life span
- 2) they focus on details too much
- 3) of various factors
- 4) they are expected to do so by the society

**72. People with low IQ scores may very well be successful .....**

- 1) but they lack motivation and personality
- 2) as they are praised by their teachers
- 3) since they devote themselves to their tasks and perform a great effort
- 4) although they have great abilities and intelligence

**73. We can infer from the passage that .....**

- 1) success is not always an indicator of intelligence
- 2) Western cultures focus on ability as the major determinant of success
- 3) an athlete can be successful in every sports if he has high IQ scores
- 4) infants adopted by privileged families tend to have higher IQs

### Passage 3

Fictional stories about people who have extraordinary abilities have always attracted people's attention. One of them is the story of Vera Petrova, who is able to perceive things with different parts of her skin, and through solid walls. One day she comes into her father's office and puts her hands on the door of a locked safe. Suddenly she asks her father why he keeps so many old newspapers locked away there. Vera's curious talent is brought to the notice of a scientific research institute and she is given a series of tests by a special commission. During these tests, she manages to read a newspaper through an opaque screen and then she describes the figures and colors of a picture hidden under a carpet. During all these tests Vera is blindfolded; and, indeed, except when blindfolded she lacks the ability to perceive things with her skin. It was also found that although she could perceive things with her fingers, this ability ceased the moment her hands were wet.

**76. As we understand from the reading, Vera Petrova .....**

- 1) can only perceive things with her fingers
- 2) is a curious child
- 3) is not the only fictional character who has extraordinary abilities
- 4) fails most of the tests administered by a special commission

**77. It is pointed out in the reading that Vera Petrova loses the ability to perceive objects with her fingers .....**

- 1) when her father first notices this ability
- 2) when she is asked to read a newspaper through an opaque screen
- 3) after she is given a series of tests
- 4) as soon as her hands get wet

**78. According to the reading, .....**

- 1) Vera Petrova's father asks her why she keeps the old newspapers in the locked safe
- 2) the scientific research institute is not interested in Vera Petrova's talent
- 3) Vera can't perceive objects with her skin unless she is blindfold
- 4) there are several scientific research institutes which examine people like Vera

#### Passage 4

Naval architects never claim that a ship is unsinkable, but the sinking of the passenger-and-car ferry Estonia in the Baltic surely should have never have happened. It was well designed and carefully maintained. It carried the proper number of lifeboats. It had been thoroughly inspected the day of its fatal voyage. Yet hours later, the Estonia rolled over and sank in a cold, stormy night. It went down so quickly that most of those on board, caught in their dark, flooding cabins, had no chance to save themselves: Of those who managed to scramble overboard, only 139 survived. The rest died of hypothermia before the rescuers could pluck them from the cold sea. The final death toll amounted to 912 souls. However, there were an unpleasant number of questions about why the Estonia sank and why so many survivors were men in the prime of life, while most of the dead were women, children and the elderly.

**81. One can understand from the reading that .....**

- 1) the lifesaving equipment did not work well and lifeboats could not be lowered
- 2) design faults and incompetent crew contributed to the sinking of the Estonia ferry
- 3) 139 people managed to leave the vessel but died in freezing water
- 4) most victims were trapped inside the boat as they were in their cabins

**82. It is clear from the passage that the survivors of the accident .....**

- 1) helped one another to overcome the tragedy that had affected them all
- 2) were mostly young men but women, children and the elderly stood little chance
- 3) helped save hundreds of lives
- 4) are still suffering from severe post-traumatic stress disorder

**83. According to the passage, when the Estonia sank, .....**

- 1) there were only 139 passengers on board
- 2) few of the passengers were asleep
- 3) there were enough lifeboats for the number of people on board
- 4) faster reaction by the crew could have increased the Estonia's chances of survival

Section Four: Cloze Passage [t.me/FastZaban](https://t.me/FastZaban) : کانال استاد مهرداد زنگیه‌وندی

**Directions: Words or phrases are omitted from the following passage, and they are numbered 86 to 100. With reference to the numbers in the passage choose (1), (2), (3), or (4) that best completes each blank.**

Fitness experts are now telling us that cycling is one of the best forms of exercise. As ...**(86)**... as making you stronger and ...**(87)**... energetic, cycling also helps to improve your breathing. Not only ...**(88)**... correct breathing help your lungs develop, ...**(89)**... it is also good for your general well-being. But for cycling to have the right. ...**(90)**... on the body, you should cycle as often as you can, ...**(91)**... the more you practice, the better the results ...**(92)**...

For people who are not ...**(93)**... doing exercise, cycling is a great start. It also has other advantages. Because it is an outdoor sport, it allows you ...**(94)**... time in the open air, and the idea of being able to escape from the noise and traffic of the city is very ...**(95)**... to many people. In countries like Germany and Holland, where cycling is extremely ...**(96)**..., special cycling lanes are often built along the side of the road. This not only gives the cyclist more ...**(97)**..., but it also prevents accidents, which are often caused by ...**(98)**... drivers, who can't wait to overtake a slow ...**(99)**... . More and more people are taking cycling in other countries too. ...**(100)**... there are no special cycling lanes.
